Research Colloquium
International Urban and Spatial Planning

PhD Candidates and progressed Master Students welcome!

Block 1: International Perspectives – Your Perspectives:
The last two decades showed a global power shift towards Asian economies, but also to other globally connected urban spaces that experience a rapid increase in international money, goods, and migration flows in this ever more connected world. More people than ever are on the move, just as new global economic relations give rise to new socio-spatial structures, including new infrastructures and spaces, new governance forms, and new forms of global planning projects. Based on the participants’ research proposals or selected thesis chapters, the research colloquium discusses the implications and changing planning rationales of this endeavor.

Block 2: Research Methods and Data Analysis
Based on the participants’ needs and methodological approaches, this block discusses different social and spatial methods and related forms of data/information analysis, their interpretation and potential visualization forms. Participants will learn about different research processes and designs, the formulation of (more refined) research questions and hypotheses, about concrete forms of interviews and interview content analyses, (non-) participant observation forms, mappings, and analytical drawings. Different role games and exercises help the participants to refine and elaborate and systematically underpin their own research projects.

Block 3: Dissertations and Next steps
This final block provides a forum to discuss the participants’ reworked individual research. Participants are asked to present their updated research in different formats. Discussants provide feedback. The final session gives also an overview of funding opportunities, application processes and present successful grant applications. Depending on the participants’ individual needs, participants are also invited to draft a research idea to discuss as potential application.

Time and Dates
Tuesday, July 23 2019 (12:00 – 16:00 Uhr, GB I 401):
Wednesday, July 24 2019 (10:00 – 13:00, GB I 401):
Wednesday, July 24 2019 (14:00 – 17:30, GB I 401):
(Alternative Dates: August 6-7 2019)
